ABOUT ME

I'm an experienced Frontend Web Developer with a year at Axlic in Fremont, California. I've gained technical skills, critical thinking, and adaptability with a positive 'can-do' attitude in my role.

While at Axlic, I played a crucial part in making websites easy to use. I'm good at solving problems and creating web pages using Vue.js and Nuxt.js. People liked my work for being creative and careful. I'm excited to use my skills on new projects and always work hard with dedication.

I efficiently translate designs from Figma or XD into creative code, enhancing the development process. Recognized for meticulous attention to detail and improving team efficiency, I am a versatile front-end developer ready to contribute my skills and collaborative spirit to new challenges.

WORK EXPERIENCE

Front End Web Developer (Remote)   OCT 2022 - Present
Axlic | Fremont, California

As a Frontend Web Developer at Axlic, I create websites, portals, and landing pages using Vue.js and Nuxt.js. I utilize Tailwind CSS, Bootstrap, and regular CSS for styling, incorporating Vuetify components based on project requirements. I also focus on design updates and bug fixes to maintain optimal website functionality and appearance.

SEO Specialist (Remote)   OCT 2022 - Present
Axlic | Fremont, California

As a dedicated SEO Specialist, I strategically optimize websites and landing pages to achieve high Google rankings. I implement comprehensive SEO techniques, including keyword targeting, graphic optimization for enhanced loading speed, and the integration of plugins when necessary. My role involves meticulous keyword research, ensuring our content aligns with specific key terms to maximize online visibility and drive organic traffic.
